Sample Elementary School

Thank you for your participation with Grinovations school-based prevention program. We appreciate the opportunity to provide the preventive dental services that have been proven through scientific research to help give kids the chance to grow up with good oral health. Oral health directly affects overall health and success in life. It has been proven that a child who is free of dental disease will eat, sleep, and study better and is thus able to better perform in school.

For your information and future reference we are including the following statistics for the services provided at Sample *Elementary School*.

School Program Statistics

Services Provided	Total Number of students
Forms Marked Yes	58
Screenings	56 (2 Absent)
Fluoride Applications	112
Cleanings	56
Protective Sealants	126
Referrals Made	20
Approx. Teeth Decayed	44

Please note, the attached sheet contains the list of students we referred to see a dentist for restorative work. We have highlighted in red the names of students who need urgent care and would encourage you to help us follow up with these students' parents specifically.

Again, thank you for your time and cooperation.

Robert (Bob) Howard, RDH, Grinovations
